

Does your child experience intense mood changes? Are they easily distracted? Do they frequently show emotions without restraint or act without regard or consequences?

10% of children between the ages of 9 and 17 have emotional disturbances that cause substantial functional impairment at home, school, and in the community...

Only 20% percent are getting the supported and services they need to reach their full potential at home, school, and in the community.

Our Mission

FamiliesETC provides coordinated assistance, support, and education to families with children who have social, emotional, and behavioral challenges at home, school, and in the community.

Our Vision

FamiliesETC will be the premier family-driven organization in Illinois.

Our Philosophy

Family-driven care means that families are empowered as the primary decision makers in the care of their own children.

As a partner in the McHenry County *System of Care*, FamiliesETC insures that the family voice is heard. It is an all-inclusive approach that collaborates with other organizations in the community.

FamiliesETC will make navigating the system easier while empowering families to utilize THEIR strengths through OUR resources.
